THE **ABCs** OF CHOOSING A SIDING COMPANY

A

Ask

1. What is the full name and address of the company? How many years have they been in business?
2. Does the company carry insurance? Ask to see certificates and confirm with the issuing company.
3. Is the company licensed/credentialed?
4. What is the company's workmanship warranty?
5. Will the work conform to the manufacturer's warranty and installation instructions?
6. Will the company provide referrals or references from previous jobs?
7. What is the company's track record for solving customer complaints?
8. Would there be any special permits required? Would they obtain them?
9. Will the company clean up the premises daily?
10. How long will the project take from the start to final clean-up?

B

Be Certain

1. That they check the condition of your exterior walls, insulation, and existing cladding – good siding contractors will thoroughly inspect these aspects of your home in order to get an accurate idea of the work that will be required. You may request that they take photos of hard to see areas that they are inspecting in order to show you the condition of the existing structure they are quoting you on.
2. **Get it in Writing** – your home belongs to you and you should be in control. Make sure that you are satisfied with the result. The terms of payment should be discussed prior to the job and are adhered to by both parties. It is inadvisable to pay for an entire job upfront. Ensure that you get any manufacturer warranties and contractor guarantees in writing.
3. **Communication** – did they return your calls? Did they send the documentation that you asked for? Did they follow through? If you answered, “no”, to these questions, then make sure you communicate your concerns to the company representative. If they still can't make good, walk away. If you aren't getting what you need on the front end when they are trying to get your business, it may be indicative of the quality they will deliver.

C

Choose

1. **A local contractor** – make sure that the company that you choose is local. This means that they are not just operating locally now, but have an established business and reputation in the community. If you have a problem within the warranty period, you will want to deal with a company that is still operating. The contractor's warranty is only as good as the longevity and reputation of their company.
2. **Workmanship** – when choosing a siding contractor, the sales person should show confidence and enthusiasm in their work and be knowledgeable about siding. A good contractor will supply appropriate product literature and samples. They will welcome your questions about siding in general, and their company specifically.
3. **Value over Price** – feel free to let the contractor know that you are shopping around but never choose a company based only on price. Cheap bids drive down the market and anyone with overhead and proper insurance has to establish pricing to cover such costs. Customers that are sold on price as their sole criteria often end up spending more money to fix problems and many of these problems would have been covered under a workmanship guarantee by a reputable, established siding company.

CELLULAR COMPOSITE SIDING BY ROYAL

Influenced
by timeless
beauty.

Unfazed
by relentless
elements.

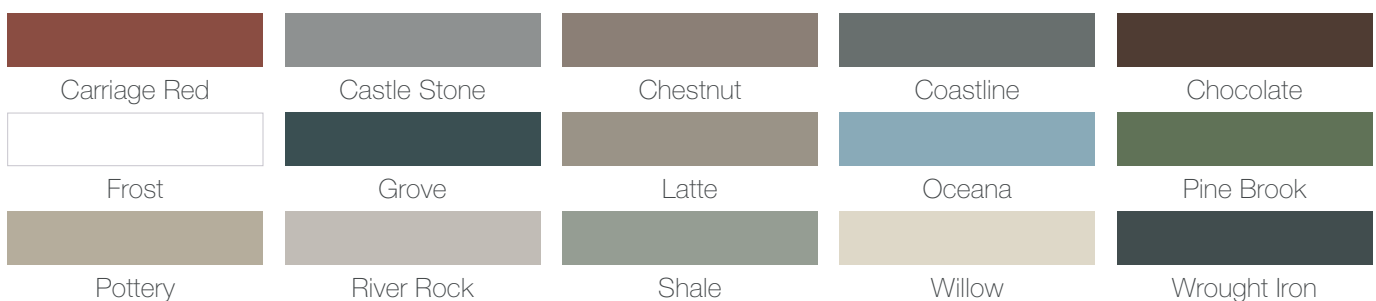

Made to astound and built to last.

Premium siding from Celect® Cellular Composite Siding by Royal® is made from recyclable, state-of-the-art cellular materials. Which means it faithfully reproduces the deep grain texture and solid heft of real wood. And every style is equally unaffected by mold, mildew, weather and the effects of time.

More than a colour palette, a coat of arms.

Celect Premium Siding's rich and deep colour palette is made with a Kynar Aquattec® coating, which provides superior UV resistance and reflects energy back into the atmosphere. That's why we put a 25-year warranty on the finish.

The result is long-term beauty you can see from across the street, from the curb and upon close inspection.

COLOUR SHOWN: GROVE

THE BEAUTY

PEEK BEHIND THE EYE-CATCHING SCENES.

The beauty of Celect® Cellular Composite Siding by Royal® is the range of powerful feelings it elicits: the pride in sheathing your home in the gorgeous armor it deserves; the peace of mind in possessing woodlike beauty impervious to mold, cracking, heat and cold; and the supreme confidence that you'll never need another home exterior.

Celect can't help looking as beautiful as it does because that's the way it's engineered. Our cellular materials faithfully emulate the rich, evocative appearance of wood. Our patented interlocking joint system makes unsightly seams virtually disappear. And our gravity lock design ensures against less-than-beautiful buckling and warping. The results? Truly premium siding looks and devastatingly handsome horizontal and vertical integrity.

Here is beautiful, dimensional evidence of Celect's seamless curb appeal, weather defiance and maintenance freedom.

PERFORMANCE

THE TECHNOLOGY OF OUR PREMIUM SIDING IS AS BEAUTIFUL AS ITS ENVY-INDUCING CURB APPEAL.

Everything you imagine and work for goes into your home. So you have every reason to expect the premium siding you invest in to perform for you decade after decade.

If you're going to build premium siding with looks as amazing as we have, you better create ways to maintain and protect those looks. So that's exactly how we engineered Celect® Cellular Composite Siding by Royal®.

Even more of a great thing:
Celect's uncompromising
aesthetics and structural
integrity are available in a
wider profile.

COLOUR SHOWN: GROVE

LOW MAINTENANCE

EMBRACE THE PREMIUM HOME EXTERIOR THAT TAKES CARE OF YOU.

For homeowners with Celect® Cellular Composite Siding by Royal®, the good life is having the most curb-appealing exterior—and the most carefree maintenance—on the block. Actually, it's a great life. A wonderful, mold-repelling, mildew-defying, insect-rejecting life.

Long-term maintenance takes its toll in time, inconvenience and cost. But not with Celect. It won't delaminate because its cellular materials won't let it. Unlike fiber cement, it eliminates the need for painting, repainting, caulking and re-caulking.

- Stands up to impact even under the harshest weather conditions
- Kynar Aquatec coating withstands all weather conditions and climates
- Backed by a 25-year colour-protection warranty
- Repels mold and mildew

It looks uniquely stunning as a gable accent on historically themed French Country homes, Cottage-style homes and farmhouses. Literally behind the scenes, it features a distinctively simple grooved back to ensure damaging moisture stays out of wall cavities.

COLOUR SHOWN: RIVER ROCK

SUSTAINABILITY

RECYCLABLE, SUSTAINABLE AND SERIOUSLY GREEN.

A life and neighborhood enriched with curb appeal is a beautiful thing. Even better: a home exterior that helps you reduce energy costs and save the environment as long as it's on your home.

- Unique white substrate helps lower heat absorption
- Kynar Aquatec[®] coating provides superior UV resistance and reflects energy back into the atmosphere—reducing the energy demands of heating and air conditioning
- Insulates 70% better than wood
- Has almost twice the R-value of fiber cement and wood

Treat your entire home to this authentic expression of rustic depth, presence and curb appeal.

Or use it as a powerful accent to tie other aspects of your exterior together.

Choose Quality, Choose Celect

CELECT® VS. FIBER CEMENT

WHEN YOU COMPARE CELECT® CELLULAR COMPOSITE SIDING BY ROYAL® WITH FIBER CEMENT SIDING, OUR SUPERIORITY IS APPARENT ON EVERY LEVEL—FROM EASE OF INSTALLATION, TO LACK OF MAINTENANCE AND DEGRADATION, TO WEATHERABILITY AND SUPERIOR ENERGY EFFICIENCY.

FIBER CEMENT

APPEARANCE

- Patented interlocking joints** create seamless appearance and help to keep walls smooth and straight
- Eliminates unsightly caulking
- No gaps, buckling or wavy lines

- Follows dips and contours of wall
- Unsightly seams with caulk lines
- Visible nail heads

INSTALLATION

- No need for special equipment: boards and trim can be easily machined with standard woodworking tools
- Superior strength-to-weight ratio means easy loading onto scaffolding
- Low-VOC product emits no harmful particles or workplace hazards
- Can be installed to grade
- Interlocking joints make Celect easier and faster to install
- Requires no caulking
- Gravity lock feature keeps individual courses straight and helps reduce installation time

- Typically requires diamond blades for cutting
- Heavy—200 pounds per 100 square feet
- Produces crystalline silica dust
- Due to moisture absorption, requires 6"-8" minimum ground clearance
- Panel width can vary course by course
- Requires flashing joints or treating end-cuts
- May require initial painting or come in a limited colour palette

MAINTENANCE

- 25-year warranty on coating, and any nicks or scratches can be easily touched up with paint
- Kynar Aquatec® coating staves off rain, dust, heat, wind and even pollution
- Celect's highly impact-resistant finish can handle heat, cold and errant baseballs better than anything
- Instead of butting against itself, Celect siding locks together perfectly, so there's no need to fill in the gaps
- Any dirt, mold or mildew can be readily cleaned away with a quick spray of a garden hose
- Provides substantially lower expected maintenance cost over the life of the home

- Typically requires diamond blades for cutting
- Heavy—200 pounds per 100 square feet
- Produces crystalline silica dust
- Due to moisture absorption, requires 6"-8" minimum ground clearance
- Panel width can vary course by course
- Requires flashing joints or treating end-cuts
- May require initial painting or come in a limited colour palette

** Patent No: US 8,402,707 B2 (2013) Patent No: US 8,596,000 (2013)

* Based on a typical estimated cost of \$7,000 every 15 years for repainting 3,000 square feet of siding

Choose Quality, Choose Celect

CELECT® VS. WOOD

BEAUTY DOESN'T HAVE TO COME AT THE COST OF WEEKENDS LOST AND MONEY WASTED. THIS BECOMES BEAUTIFULLY APPARENT WHEN YOU COMPARE CELECT® CELLULAR COMPOSITE SIDING BY ROYAL® WITH WOOD SIDING.

WOOD

APPEARANCE

- Interlocking joint system keeps boards straight and aesthetically stunning
- Eliminates unsightly caulked seams
- No gaps, buckling or wavy lines

- Seams warp and separate
- Follows dips and contours of wall
- Visible nail heads

INSTALLATION

- Patented interlocking joint system makes Celect easier and faster to install
- Seams require no caulking
- Gravity lock feature keeps individual courses straight and helps reduce installation time
- Quick installation results in lower labor costs

- Panel width can vary course to course
- Requires initial staining or painting
- High installation cost

MAINTENANCE

- Factory-applied colours are designed to stay true so there's no need to repaint
- Kynar Aquatec® coating staves off rain, dust, heat, wind and even pollution
- Celect's highly impact-resistant finish can handle heat, cold and errant baseballs better than anything
- Instead of butting against itself, Celect siding snaps together perfectly, so there's no need to fill in the gaps
- Easy to clean with a quick spray of the garden hose
- Lower maintenance costs over the life of the home

- Susceptible to mildew and rot
- Needs ongoing painting, staining, sealing and caulking
- Requires mold and mildew treatment
- Wood trim requires maintenance

Choose Quality, Choose Celect

CELECT® VS. ENGINEERED WOOD

WHEN COMPARED WITH ENGINEERED WOOD, CELECT® CELLULAR COMPOSITE SIDING BY ROYAL® OFFERS MORE DESIGN OPTIONS, MORE DURABILITY AND LESS MAINTENANCE OVER TIME. WHICH SHOULD ELIMINATE ANY DOUBT AS TO WHICH IS THE SMARTER EXTERIOR TO PUT ON YOUR HOME.

ENGINEERED WOOD

APPEARANCE

- Interlocking joint system keeps boards straight and aesthetically stunning
- Eliminates unsightly caulked seams
- No gaps, buckling or wavy lines

- Seams warp and separate over time
- Fewer design options

MAINTENANCE

- Factory-applied colours are designed to stay true so there's no need to repaint
- Kynar Aquatec® coating staves off rain, dust, heat, wind and even pollution
- Celect's highly impact-resistant finish can handle heat, cold and errant baseballs better than anything
- Instead of butting against itself, Celect siding snaps together perfectly, so there's no need to fill in the gaps
- Easy to clean with a quick spray of the garden hose
- Lower maintenance costs over the life of the home

- Susceptible to mildew and rot
- Needs ongoing painting and repainting
- Requires mold and mildew treatment

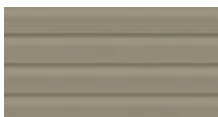

CELECT® LEAVES NO DOUBT WHICH SIDING IS THE SMARTEST

Woodgrain presence. Effortless endurance.

Estate siding's reason for being is to make sure you'll never again have to trade low maintenance for timeless exterior design and curb appeal. Estate is easy to live with and a no-brainer to love. Its new teardrop lock design ensures it will never cry in the face of wear, tear, wind, rain or snow. And its wide range of UV-resistant colors go out of their way to match virtually any home.

Features & Benefits

- Beautiful woodgrain captures the look and feel of natural wood
- 5/8" butt height for outstanding shadow lines
- Low-maintenance vinyl panel won't warp, buckle or sag
- Partial rollover hem provides exceptional wind load resistance
- Can withstand hurricane-force winds up to 180 mph
- Available in a broad array of UV-resistant standard colors and deep, rich Colorscaapes® shades to fit your design
- Industry-leading Double Lifetime Warranty includes color and hail protection

ROYAL® WOODLAND

COLOUR SHOWN: GRANITE

Always review a physical sample when choosing a colour. Printed colours may vary.

Comes in shades of “I want that.”

Want lots of colors and styles to choose from? Don't want to think about maintenance or what will happen to your siding in the face of strong winds and the march of time? Royal® Woodland siding gives you 31 UV-resistant colors that won't change overtime. Plus they come in longer-length 16-foot and 25-foot panels that decrease seams, provide dramatic shadow lines and increase curb appeal.

Features & Benefits

- Heavy gauge delivers straight, clean finish with superior strength
- Longer-length 16' and 25' panel options for a more seamless appearance
- Low-maintenance vinyl won't warp, buckle or sag
- Can withstand hurricane-force winds up to 200 mph
- 31 UV-resistant colors available in a full palette of standard colors and deep, rich Colorscares™ shades
- Industry-leading Double Lifetime Warranty includes color and hail protection

WEATHERED

So much warmth and beauty, you'll never want to go inside.

Blow right past quaint and go straight to stunning. Though technically described as "classic," our high-beauty, low-maintenance Portsmouth™ Cedar Shingles siding ensures "Welcome home" never gets old—whether as a full exterior or a complementary element. Combine this classic shingle style with other materials such as stone and clapboard for a change of design pace and some extra eye candy.

Features & Benefits

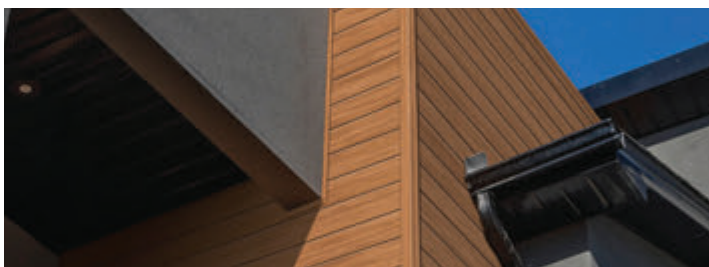

- Seamless design
- No painting, no scraping
- Virtually no maintenance
- Assurance™ Fastening System for secure, precise installation
- Superior impact, fade and warp resistance
- Realistic natural cedar texture
- Sides beautifully with other materials
- Wind resistant greater than 200 mph (velocity ultimate)
- Lifetime Limited Warranty

NEW | CEDAR RENDITIONS™ BY ROYAL® DESIGN SERIES

Aluminum is illuminating again.

Aluminum siding is well known for how strong, reliable and durable it is. And now Royal AlumiPro Cedar Renditions is demonstrating its curb appeal. Cedar Renditions has the look of woodgrain minus the maintenance and flammability. And everyone from homeowners to building pros are illuminating exteriors in the form of accent siding, main siding and soffits.

Features & Benefits

- Easy to install
- Resembles wood
- Virtually maintenance-free
- Moisture-proof
- Nonflammable
- LEED compliant and 100% recyclable
- Made from 99% recycled content
- 25-year prorated limited warranty

ROYAL® ALUMIPRO COMPONENTS BREAKDOWN

1 Box Mitre

Miters, or corner pieces, are the gutter fittings that connect two gutters at a corner.

2 Trough

A shallow trough fixed beneath the edge of a roof for carrying off rainwater.

3 J-Trim

A piece of trim that mounts to the structure at the wall and holds the soffit panel in place.

4 Elbow

Used when the downspout changes angles and directions.

5 Downpipe

A pipe to carry rainwater from a roof to a drain or to ground level.

6 Pipe Strap

A device used to attach a section of gutter to a building's structural framing.

7 Soffit

A horizontal surface under a roof eave that is typically vented allowing for better air circulation.

8 End Cap

Used to cap off the end of a Trough.

9 Fascia

A type of horizontal molding applied at rafter ends and the perimeter rake edges of the roof line.

10 Outlet

A one-piece outlet tube for joining the flat bottom wall of a metal gutter with a vertical downspout is formed from an initially flat blank.

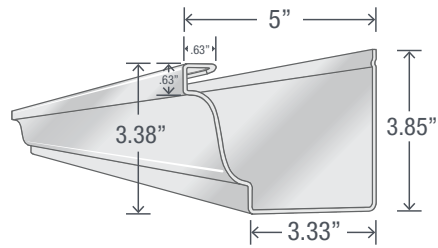

11 Bracket

Used to fasten the trough to the fascia
